Work Experience

Software Engineer II, Platform

10/2023 - Present

Software Engineer, Platform

11/2021 - 09/2023

Grove Collaborative (E-commerce)

San Francisco, CA

- Serves as the subject matter expert and architect for the product information management system, a standalone application which extends and transforms data from Shopify to enable enhanced features
- Orchestrated a company-wide initiative to transition billing to a charge-on-fulfillment model, reducing refund rates and improving cash flow, resulting in more predictable revenue
- Led data migration efforts during the company's replatforming to Shopify to ensure continuity of the customer shopping and subscription service experience while maintaining parity with previously developed custom functionality

Software Engineering Teaching Assistant

08/2021 - 10/2021

General Assembly (Software Engineering Bootcamp)

Remote

- Expanded on computer science fundamentals taught in class during 1:1 tutoring and provided debugging assistance for student projects

Web Developer

02/2019 - 10/2021

Freelance

Remote

- Worked with clients to design and build bespoke websites

Marketing & Communications Coordinator

09/2018 - 07/2019

The People Concern (Nonprofit)

Los Angeles, CA

- Designed a web app to support individuals experiencing homelessness
